

# DOCTORS AND THERAPISTS ARE IMPRESSED WITH OLIVE LEAVES

When it comes to finding a safe, natural alternative to antibiotics for exterminating harmful pathogens from the blood, we have a potent remedy: it grows on trees, in the form of olive leaves! There are no harmful side effects or contra indications and the additional boost to the immune system as well as the blood circulation is proof enough that Mother Nature has the cure.

Most people do not have access to fresh olive leaves, so we make olive leaf remedies for all to share the benefits of this outstanding remedy. Nature Fresh olive leaf tablets and tinctures are made out of the full leaf of two species of olives: *Olea Europa* and our own indigenous *Olienhout*, of which there are many subspecies. These hardy and bug-resistant trees grow wild in the Cape and are free of artificial fertilizers, pesticides and toxic chemicals. Their deep roots draw in the vital minerals and trace elements from the earth and convert them, along with sunlight, pure rain water and fresh air into one of the most healing substances on earth. All we do is process the leaves into a tablet that is free of animal products and artificial chemicals.

## WHAT DOCTORS AND THERAPISTS HAVE TO SAY ABOUT OLIVE LEAF REMEDIES:

1 George Heye of Somerset West was very impressed by their immune boosting ability when he tested them. He recommends chewing two tablets every two hours after his initial treatment that includes the use of a frequency resonator, magnetic blanket, vibrational medicine and a thorough detox & pH balance. Patients feel well, energetic and refreshed and many hopeless patients have recovered from cancer and other debilitating diseases. Tel: 021 8511777

2 In Johannesburg, a lady doctor had all but given up on all her candida patients, but she

cured over twenty of them in the first month with the olive leaf tablets.

Many Traditional Healers and Doctors treating patients in the rural areas of South Africa are reporting back with good results, especially with TB & weakened immune systems, colds & flu, poor circulation and general debility.

3 Port Elizabeth doctors have reported stunning results by using olive leaf tablets for cases of : malaria, tummy bugs, poor circulation, colds & flu, and even persistent acne. They asked us to make a tincture, to give to children and people who hate tablets. The topical application of the tincture is also good for skin conditions such as: acne, warts, scabies, ringworm and athlete's foot. They also prescribe our anti-microbial body wash that contains olive leaf.

In Cape Town, head lice epidemics are a frequent nightmare. We developed our anti-microbial body wash as an alternative to harsh and toxic shampoo. A few drops of peppermint oil in any hair conditioner is used to prevent a further outbreak of nits and headlice. Many schools use our products. The tincture was used to control a spreading epidemic of scabies, stopping the itch and preventing further infestations, especially when used with the anti-microbial body wash.

4 A leading Cape Town gynaecologist identified a vaginal pathogen and his patient refused the normal antibiotics recommended, but the second swab indicated she was clear of the infestation, thanks to washing with Nature Fresh anti-microbial body wash. He also makes use of the anti-microbial first aid cream for treating fungal and yeast infections. He urged us to formulate specially pH balanced vaginal cleansers and natural lubricants for his patients.

5 James Liddell, a Cape Town

Homeopath and Naturopath has a Pharmaceutical background, but could find nothing to solve leaky gut and candida syndromes until he discovered olive leaf tablets. He combines the treatment with Homeopathic constitutional remedies, dietary advice and supplements that now prove to be totally effective in rooting out these complex yeast/mould and fungal infestations. Once the candida is cured, he finds his patients begin to lose weight as well. James prefers the olive leaf & calmag tablets for his patients. Call TOPTRIM LIFESTLYE CLINICS AT: 021 713 2295

NB: The combination tablet with calcium and magnesium helps reduce acidity released by parasites, viruses, bacteria and other pathogens as they die. This Herxheimer effect is a well known reaction the body has as part of the healing and detoxifying process. Controlling the pH is important at this stage, to prevent reactive diarrhoea, head-aches or nausea caused by too much acidity. It is best to combine olive leaf tablets or tinctures with Nature Fresh Calcium complex or use the olive leaf & calmag tablets, especially for young children.

## THE CANDIDA AND LEAKY GUT SYNDROMES: STOP THEM DEAD IN THEIR TRACKS

Of special note are two nasty bugs: *gardinella* and *giacardia lambellus*, the unicellular organisms most responsible for the leaky gut syndrome, and they don't stop there, hence the correct diagnosis: the permeable membrane syndrome. They thrive on yogurt type cultures and burrow through the walls of your gut, chest and other organs. Many people do not know this, so they keep feeding these little pathogens with the food they love most: yogurt and most of all, probiotics! The victims

Sue Visser

wonder why they have this condition and keep treating it with yogurt and go on all sorts of fiendish elimination diets. Firstly, stop feeding them, and secondly, wipe them out in one fell swoop, with olive leaves. Then embark on a good range of healthy and enjoyable foods that suit your particular constitution and blood type. Use Nature Fresh body washes, lubricants and creams to balance vaginal pH and to soothe any irritations you get. According to the countless reports I get from appreciative doctors and therapists, this treatment really works.
