

**NF 048 PROBIOTIC-15 SPRAY - 200ml amber spray bottle Image
Height 16 cm including spray**

This spray-on version of PROBIOTIC-15 liquid is enhanced with 10% colloidal silver for extra activity at a low dose that does not affect the friendly bacteria. Spray it onto food or water to help counteract infections from dirty hands, or from raw salads or meat; before serving, cooking or eating them. Use it on the skin for infections, flaky scalp, ulcerated wounds or on itchy bumps and rashes.

Probiotics are important to control the overgrowth of yeast that causes Candidiasis. A deficiency of these 15 probiotic strains = candida problems. The daily dose is 5 – 15 ml. This also provides 200mcg of selenium. In South Africa we are deficient in selenium – the antioxidant mineral that helps to prevent cancer and HIV / AIDS.

PROBIOTIC-15 is a liquid concentrate of the three basic families of probiotic strains: lactobacillus, phototropic probiotics (similar to blue-green algae) and beneficial yeasts that do not cause candidiasis. These beneficial microbes consume the trouble making candida! When we take antibiotics and even large and frequent doses of herbs like goldenseal, oregano oil, echinacea or propolis we kill off the beneficial gut microbes as well. In other words, we compromise over 80% of the immune system and that is why we suffer from candida and constipation!
