

NF 004 JUNIOR TOOTHPASTE 75ml tube Pack height 13cm

A mild, creamy beginner's toothpaste with Rooibos, Calendula, xylitol, stevia and special NATURAL FLUORIDE (calc fluor D6) Safe enough for babies or small children to swallow or use on teething rings. Aniseed helps ease griping, drooling and teething pains. Contains no mint, so can be used with Homeopathic remedies as it does not antidote them. (Children sensitive to salicylic acid are advised not to use mint toothpaste.)

Why no fluoride? Fluoride destroys collagen tissue, the connective tissue that we find all over the body, from inside your bones and blood vessels to between your teeth and gums. This results in bleeding and receding gums and bad breath due to the die off of healthy mouth tissue. Junior toothpaste contains the tissue salt Calc Fluor, a homeopathic form of fluoride that is totally nontoxic. Just the right amount of fluoride is necessary to form a strong, even coating of tooth enamel. An excess of fluoride causes uneven tooth and bone formation, leaving irregular surfaces that contain both hard and soft patches. Teeth and bones may then become brittle because the weakened collagen tissue inside collapses and does not bond sufficiently to other minerals like calcium, magnesium and phosphorous. Have you seen people with severe fluorosis – weak, blackened brittle teeth that snap off at the roots?

All our Oral Hygiene Products are non-toxic, FLUORIDE FREE and safe to swallow albeit unintentionally. <http://naturefresh.co.za/how-safe-is-fluoride/>

Traditional herbal products - never tested on animals.

They should therefore not be used to diagnose or treat any disease, or replace professional medical advice. To ensure appropriate medical care, report ailments/symptoms to your doctor or health practitioner. Don't not stop taking your prescription medications or combine with other treatments unless advised to do so by a medical practitioner. Therapeutic effects may vary according to the unique constitution or condition of a patient. Read the ingredient lists and instructions. [Nature Fresh Data Base for COVID-19 pandemic](#)

Brush teeth after breakfast and at bedtime. The product is not harmful if accidentally swallowed, but try to encourage kids to rinse out their mouth after brushing teeth.

WELCOME TO HAPPY TEETH!

Xylitol and stevia help to protect teeth from plaque. Calendula, aloe, rooibos and aniseed help to soothe and disinfect inflamed gums during teething. Calcium, Zinc, sea salt, magnesium and natural fluoride (Homeopathic D6) help teeth to grow strong. A pH of 7 encourages healthy saliva that helps to freshen breath and prevent tooth decay.

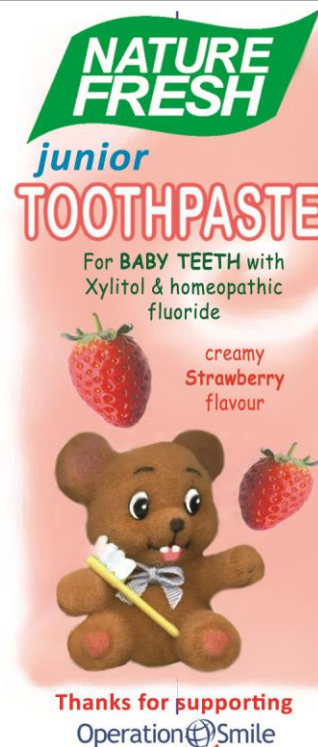

Ingredients: Purified Water, Calcium and Magnesium Carbonate, Zinc Oxide, Sodium Chloride, Vegetable Glycerin, Hydroxyethyl-cellulose, Polysorbate 20, Citric Acid, Cocamidopropyl Betaine, Aniseed Oil, Nature Identical Strawberry Flavour, CALC FLUOR D6, Xylitol, Propylene and Methyl Hydroxy Benzoate, Calendula, Aloe, Rooibos, Stevia.
