

NF 022 HERPEASE: 20ml squeeze bottle. Pack height 8 cm

To help banish fever blisters for keeps! Prevents future outbreaks if used prior to or during exposure to sun and wind. Good results on unsightly and painful blisters. It contains L-Lysine, lemon balm, olive leaf, tea tree oil, myrrh, zinc, copper, camphor and eucalyptus oil. For cuts, bumps, infected sores.

Fever blisters around the mouth or genitals develop and reproduce in the absence of the amino acid Lysine. Topical application of a cream containing Lysine helps to inhibit the growth of the herpes virus. HERPEASE contains natural anti-fungal, anti-bacterial and anti-viral agents from Tea tree oil, myrrh and copper extracts. Rooibos, aloe, urtica, calendula and rosemary help to soothe and disinfect the area. Essential fatty acids help encourage the growth of healthy new tissue. Fungal infections such as candida albicans may also respond well to this treatment

INGREDIENTS: Aloe Ferox, rooibos, urtica, calendula, Tea tree oil, myrrh, rosemary, copper extracts, vegetable oils containing Omega 3 & Omega 6 in a cellulose gel base. Natural colour from herbs & copper.

DIRECTIONS: Apply every few hours to an infected area. If possible, apply prior to an attack, if you have a cold or before you are exposed to sun and wind, when you are most vulnerable. As soon as you feel a burning or tingling, apply HERPEASE frequently to the whole area around the mouth, lips or genitals that may become affected. Use BEE BALM on scabs that are healing.

The truth about parabens

<http://naturefresh.co.za/truth-about-parabens/> The p-hydroxybenzoic acid by-product is found in nature as well and found in such things as carrots, olives, cucumbers, strawberries to name just a few. They control pathogenic microbes to protect products from contamination and are not dangerous cancer forming chemicals like xenestrogens.

Traditional herbal products - never tested on animals.
