Excellent remedies for colds and flu will not stop them from returning a few times a year if you are harboring intestinal worms and other parasites! For example: most people who take olive leaf remedies as an immune booster hardly ever suffer again from colds and flu but this is because the olive leaves eliminate a large number of their resident parasites that are also infected with viruses, bacteria and other pathogens.

**45% OLIVE LEAF** (Olea Europa and Olea Africana) Help to eliminate most microbial infections, including Candida Albicans, Epstein Barr, Cytomegalovirus, genital herpes, shingles, cold sores and retrovirus, HIV, malaria, colds and flu. Often these organisms inhabit larger parasites like flukes and worms that may be present, prior to attacking you but olive leaves have been known to destroy these parasites as well. Olive leaves help to lower blood pressure naturally, stimulate micro-circulation and boost the immune system, helping to improve white cell counts in HIV AIDS patients.

**25% WORMWOOD** (Artemisia Absinthium) A traditional remedies for tapeworm, all types of intestinal worms and liver flukes, including the various stages of Bilharzia (schistosomiasis) and COVID-19 At recommended doses, wormwood is not harmful – except to parasites! Artemisia is friendly to the gut flora, even though it has a powerful antibiotic action. It is now widely used to help treat and prevent malaria. It helps to clear up kidney and urinary infections.

**15% IVY** (Hederae Helix) One of the best remedies we have for liver flukes, also used for treating congestive mucous-laden coughs and persistent catarrh. It is safe to use and non-toxic. It was a chief ingredient of many old-fashioned cough mixtures and expectorants. Ivy has antimutagenic properties to help fight some forms of cancer.

**15% CLOVES** (Eugenia caryophyllata) Cloves have a powerful antimicrobial action and are especially helpful for gut infections like dysentery, food poisoning, shigella and the “thunderguts.” Cloves contain eugenol, a valuable remedy for urinary, bladder and kidney infections. They help fight all types of fungi and moulds and are very good for killing off the egg and larval stages of larger parasites.
