

NF 46 COLEUS FORSKOHLII - 50ml tincture of 40% alcohol. Height 9.5 cm

The tincture contains forskolin that activates cyclic AMP to help treat: hypertension, mild congestive heart failure, asthma, psoriasis, digestive problems, glaucoma, persistent urinary infections and insulin resistance. Anti-inflammatory, anti-histamine, calms the nervous system and stimulates thyroid function to speed up metabolism. Helps release stored glycogen from the liver to balance low blood sugar and assists treatment of syndrome X (diabetes 2) PCOS (polycystic ovarian syndrome). Popular for weight loss and fat burning (Dr OZ). Coleus for fat loss

Coleus has many fat loss mechanisms and helps to balance cortisol and blood sugar: Forskolin in Coleus stimulates signaling agents within adipose tissue, leading to the breakdown of triglycerides and the subsequent release of fatty acids and glycerol into the bloodstream. During endurance exercise, these fatty acids are extracted from the bloodstream and burned as a fuel to provide ATP energy to the exercising muscle. In turn, fat cells shrink in size, helping overweight patients reduce their body fat more efficiently. Many of these people have a resistance to burning fat caused by higher serum insulin levels and insulin resistance (syndrome X), which tends to lock fatty acids and triglycerides in fat cells, reducing the fat-burning ability.

Hypertension: forskolin relaxes blood vessel smooth muscles via increased cAMP synthesis, helping to reduce high blood pressure by reducing resistance to blood flow. Forskolin antagonizes the action of platelet-activating factor (PAF) by interfering with the binding of PAF to receptor sites on cells. In turn, this reduces platelet stickiness and smooth muscle contraction of blood vessels and bronchiole air passageways. Again, these effects are mediated through increased synthesis of cAMP. A preliminary trial found that coleus reduced blood pressure and improved heart function in people with cardiomyopathy. Coleus also increases cerebral blood flow, indicating that it may be beneficial in cerebral vascular insufficiency, and in enhancing post-stroke recovery.
