

How to stop the flies from laying eggs:

Take a few sheets of newspaper:
Then wrap up the wet waste or feces quickly. Tie it in a plastic bag. Your dust bin should also have a plastic bag inside it. Tie it up before you use the bin room.

Why is newspaper so important?

Flies cannot get to the garbage inside a newspaper parcel. They cannot smell it or lay any eggs. Also, maggots cannot escape out of the newspaper into the bin rooms! It is even better to keep these parcels tied up inside a plastic bag.
